

## DJ Peterson SWWA Director

I am a Waterworks Operator, and Wastewater Operator for the Town of Wynyard. I've worked here for 7 years. Wynyard has always been my base point, being my home, where I work and where I grew up. I am dedicated to my community and you can always find me involved somewhere around town. I hold a position on our community recreation board, been on a recreation fundraising committee, and love to help out with Communities in Bloom. If you want your town to flourish I really believe you have to see too it and not wait for someone to get things done. I'm grateful to have such a supporting community to continually send me for training and support all that I want to do. I am engaged to Barry Haynes Add a little bit of body text who works for Canadian Pacific; together we have two adorable children Wilson and Gunnar along with two dogs. You can always catch us as a family outdoors boating, fishing, hunting or ski doing. I hold a Class 2 for Water T and D and a Class 1 for Wastewater C and T. I love to get involved with everything and SWWA is the perfect place for me to dig in more into the water industry. I'm passionate about the water we produce and distribute and I hold what we do as operators to a high standard. I really look forward to serving on the board to be a voice for small towns, and women in the industry.
