Delco Water/Delco Automation

Delco Water, a division of Delco Automation Inc., is a premier water treatment solutions provider and equipment integrator. Delco Water's customized approach to water treatment delivers tailored solutions to customers across North America. Our array of process technologies are designed to effectively treat even the most difficult source waters while offering advanced automation options and considering operation costs and complexity. Striving to provide the most advanced and innovative methods of water and wastewater treatment, our team is consistently evaluating new ideas and looking for potential ways to improve current technologies or methodologies. Delco Water offers a variety of water and wastewater treatment options, such as Reverse Osmosis, Ultrafiltration, Nanofiltration, Biological Filtration, Media Filtration, MBR and MBBR. Our goal is to be there for the entire life of each system, from the design stages, to commissioning, to ongoing maintenance. Our field service and maintenance department is well-equipped to deal with continued service, support, operator training, troubleshooting, and any warranty items that may arise with a Delco system.
